### LANGUAGES/TOOLS/Frameworks/CONCEPTS

- Python, SQLite, Git, Selenium, BeautifulSoup
- Flask, Pandas, Plotly, Matplotlib

## PROFESSIONAL EXPERIENCE

### HACKATHON PARTICIPANT | CYPRUS CODES | APR 2024

- Developed PlanSmith, an AI-driven extension to enhance construction management.
- Collaborated with a team using JavaScript, resulting in a tool for floor plan generation and cost estimation.
- Architected a multi-module application and created a testing library, improving testing efficiency across teams.

## PERSONAL PROJECTS

### MUSIC TIME MACHINE

- Developed a Python application creating Spotify playlists from historical Billboard Hot 100 charts.
- Used BeautifulSoup for web scraping and Spotipy for Spotify Web API integration.

### BLOG WEBPAGE

- Built a blog website with Flask, featuring user registration and secure login.
- Managed database operations with SQLAlchemy and implemented a comment section.

### STOCK ALERTS APP

- Created an app tracking stock prices and sending alerts for significant changes.
- Integrated API calls and SMS notifications using requests library and Twilio SDK.

### LEGO DATA ANALYSIS

- Investigated a comprehensive dataset on LEGO to uncover trends and insights about the company's history, product offerings, and most popular themes.
- Presented insights on LEGO's product evolution and popularity trends.
